

Quality care at Kauvery

With their constant focus on better healthcare provision, Kauvery Hospital is synonymous with trust

The dreams of doctor promoters, who were driven to launch a 30-bed critical care set-up, paved the way for Kauvery Medical Centre. Twenty-one years later, the 30-bed critical care centre is now a colossal 1,200+ bed multispeciality hospital chain operating out of five locations — Tiruchy, Chennai, Salem, Hosur and Bengaluru — with seven hospitals under its wing offering exemplary secondary as well as tertiary care for all.

The Kauvery journey is a tale of two decades. The first decade of Kauvery Hospital's growth was propelled by Tiruchy. With three hospitals being established in Tiruchy - Tennur, Cantonment, and Heartcity, Kauvery Hospital established a strong sense of trust and loyalty for offering expert and compassionate healthcare services.

The second decade meant growth

with centres being established in Hosur, Salem and most importantly, a presence in the state's capital, Chennai. This cemented Kauvery Hospital's vision of becoming the most trusted healthcare provider.

The launch of Kauvery Hospital Chennai, seven years ago, as a 200+bed multispeciality hospital in the heart of the city, skyrocketed the value of Kauvery Hospital, from a home-brewed healthcare brand in Tiruchy to a regional healthcare chain offering the highest quality of care, quickly rising to be among the top-3 hospitals of Chennai, according to the Times Health Survey 2020. The initiation of Kauvery Hospital Salem and Hosur has been pivotal to offer advanced tertiary care and state of the art treatments for the rural and suburban population.

In the last five years, Kauvery Hospital's investment towards cutting-edge technology has led to the team of experts at the hospital pioneering path-breaking surgeries and interventions. Be it India's first single-stage hybrid heart surgery, the launch of India's first

hybrid cath lab operating room, or the introduction of anaconda stent grafting for the first time in India, Kauvery Hospital has always armed its experts with the latest technology to enable enhanced clinical outcome.

Talking about crisis management, Kauvery Hospital's dedicated Covid response has been crucial in saving lives. Right from immediately setting up Covid centres in Chennai and Tennur with dedicated fever clinics and hospital wings converted into Covid-wards. The brand responded to the call of duty instantaneously. During such a battle, hope prevailed, ensuring they lost none of their staff members to COVID-19, while facilitating more than 95% recovery for those who tested positive, among which was a 97-year-old gentleman from Chennai.

The awards and accolades received by Kauvery Hospital in the last two decades stand testament to the quality of care offered. Kauvery Hospital's vision to be the most respected healthcare provider is fueled by the values of care, compassion, clinical excellence and trust.

Dr Aravindan, Co-Founder & Executive Director Kauvery Hospitals
